	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Player 1 enters a 5-letter word that is hidden. ● Player 2 gets six guesses. ● Program checks that every guess and the hidden word are exactly 5 letters. ● Green, yellow, and gray feedback after each guess. ● The game has a win and lose message that shows the correct word ● Players have the option to keep the game going and switch roles.	**Schedule - (For V2.0+)** ● Different modes like first to three wins ● Show which letters were already used ● The game keeps track of the score across the rounds.
Not Important	**Delegate - (Use a library)** ● Use a library to show the color feedback (green, yellow, gray) ● Use a public word list to check if the guesses are real words ● Use a library to clear the screen so player 2 can't see the hidden word	**Delete - (Cut it)** ● AI opponent ● Online leaderboard ● Turning the game into an app
